VERSION WITH MARKINGS TO SHOW CHANGES MADE

Please amend claims 1, 14, and 21 as follows:

1. An electric motor, comprising:

a plurality of stator sections, each stator section including an outer housing,
wherein the plurality of stator sections are mechanically and electrically
coupleable to form a stator of a desired length; and

a rotor disposed within the plurality of stator sections for rotation therein.

14. A submersible pumping system, comprising:

a submersible electric motor, including:

a plurality of modular motor sections, each motor section includes a stator
section and a housing section, wherein the modular motor sections
are mechanically and electrically coupleable to form a motor of a
desired length;

a rotor disposed within the plurality of modular motor sections for rotation
therein; and

a submersible pump, drivingly coupled to the rotor of the submersible electric motor.

21. An electric motor for a submergible pumping system, comprising:

a plurality of stator sections adapted to form a stator of a desired length, wherein
each of the plurality of stator sections comprises a mechanical and
electrical coupling to permit selective attachment to an adjacent stator
section ; and

a rotor disposed within the plurality of stator sections for rotation therein.
